PROFESSIONAL SUMMARY

Software Engineer with nearly 5 years of experience building scalable, production web applications with React.js, Next.js and TypeScript, with working knowledge of Node.js, Express and MongoDB. Experienced in owning frontend modules end-to-end, from requirements and architecture to testing and release, and in using AI-assisted tools (Claude Code, GitHub Copilot) to work faster. Comfortable working directly with clients, taking over unfamiliar codebases and guiding other developers to keep delivery on track.

WORK EXPERIENCE

Software Engineer January 2022 – October 2026
Simform, Ahmedabad, Gujarat *4 Years 9 Months*

- Joined as a trainee and was onboarded as Software Engineer in **4 months**, ahead of the standard 6-month program.
- Delivered **5 client production applications** and 1 internal product with React.js and Next.js, owning frontend modules from requirement analysis through API integration, testing and release.
- Worked directly with clients, designers and backend teams to clarify requirements, resolve blockers and align features with business needs.
- Led an AI-assisted Supabase-to-REST API migration (Axios, TanStack Query) with Claude Code, moving **35+ endpoints across 8+ modules in under 2 weeks** without breaking existing functionality.
- Automated repetitive development tasks with Claude Code Skills, Commands, Agents and MCP integrations, and used GitHub Copilot daily for coding, debugging and refactoring.
- Defined frontend architecture and state-management patterns with Redux Toolkit and TanStack Query, and guided **2–3 junior developers** on component design and coding standards.
- Developed reusable components, dynamic forms, authentication flows and role-based access control (RBAC) used across multiple client applications.
- Wrote unit tests with Jest and React Testing Library, meeting the team's **70% coverage** standard.

Key Client Projects

Legal Document Management & E-Signature Platform | *React.js, TypeScript, TinyMCE, HTML5 Canvas*

- Delivered frontend features for document creation, signer management, assignment and multi-step signing.
- Engineered a sequential multi-signer workflow where each signer sees and completes only their own fields.
- Created TinyMCE Smart Fields with regex-based signer mapping and a unique color per field to identify it.
- Resolved multiple Smart Field creation edge cases and added HTML5 Canvas signature capture.

Mutual Fund Management & Investment Platform | *React.js, TypeScript, TanStack Query, Redux Toolkit*

- Managed **4–5 modules** in a fast-paced multi-developer team, resolving cross-module issues to keep releases on schedule.
- Integrated web-to-native bridges for **4 native features** (biometric login, payments, printing, external links) across web and mobile apps.
- Implemented financial calculations and role-specific workflows, and fixed XSS issues in a print feature.

Time Tracking & Workforce Management Admin Platform | *Next.js, TypeScript, Tailwind CSS, shadcn/ui, MSAL*

- Led frontend development of a Next.js time-tracking and user-management platform with MSAL login.
- Designed the role-based access module and dynamic filtering for user and time-log management.
- Established a consistent design system with Tailwind CSS and shadcn/ui, reused across the admin screens.

Business Data Management Platform | *React.js, TypeScript, GraphQL, TanStack Table*

- Owned 4–5 modules with dynamic tables, infinite scrolling, server-side pagination and debounced search.
- Added permission management across **5+ access levels**, with GraphQL-driven data tables for large datasets.
- Took over an unstable inherited codebase, debugging and restoring broken scrolling, pagination, search and table data mapping.
- Improved page performance by **35–40%** (Lighthouse, React DevTools Profiler) by removing duplicate API calls and unnecessary re-renders.

PERSONAL PROJECT

LearnHub – Full-Stack Academy Directory

React 19, TypeScript, Express 5, MongoDB, Mongoose, Tailwind CSS, shadcn/ui, TanStack Query, React Hook Form, Zod

- Built a full-stack platform where learners browse coding academies and courses and leave reviews, publishers manage their own listings, and admins moderate users and content.
- Set up JWT authentication with httpOnly cookies, email-based password reset and access control for users, publishers and admins, with ownership checks on every update and delete.
- Secured the REST API against mass assignment, NoSQL injection, XSS and regex injection, with Helmet, rate limiting and HPP.
- Wrote a reusable query middleware for search, filtering, sorting and pagination, with ratings calculated automatically by MongoDB aggregation pipelines.

SKILLS

Languages & Frameworks	JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3
State & Data	Redux Toolkit, TanStack Query, TanStack Table, Context API, REST APIs, GraphQL, Axios
UI & Forms	Tailwind CSS, shadcn/ui, Ant Design, Bootstrap, React Hook Form, Zod, Recharts
Backend & Auth	Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, RBAC, MSAL
Testing & Quality	Jest, React Testing Library, ESLint, Prettier, Husky, lint-staged, commitlint
Tools & Deployment	Git, GitHub, Bitbucket, Vite, Postman, Azure, Vercel, Render, Cloudinary, Figma
AI-Assisted Development	Claude Code (Skills, Commands, Agents, MCP), GitHub Copilot

EDUCATION

Master of Computer Applications (MCA) 2020 – 2022
Government MCA College, Maninagar (GTU), Ahmedabad *CGPA: 8.52*

Bachelor of Computer Applications (BCA) 2017 – 2020
C.U. Shah College, Surendranagar (Saurashtra University) *CGPA: 7.2*
